<b>Abstract</b>	<b>3</b>
<b>1 - Introduction</b>	<b>5</b>
<b>2 - Theory of hedonic indices</b>	<b>9</b>
2.1. The rationale for hedonic approaches	9
2.1.1. Hedonic model with a priori stratification	9
2.1.2. Problematic alternative approaches	10
2.2. Using the hedonic model	10
2.2.1. Estimating adjustment coefficients	11
2.2.2. Estimating reference value for date t	11
2.2.3. Constructing a valuation system	12
2.2.4. Constructing an array of indices	12
2.3. Making the hedonic approach more robust	12
2.3.1. The search for underlying scores	13
2.3.2. Strata aggregation	13
2.4. Monitoring the specification	13
2.5. Extending the basic model	14
<b>3 – Calculation procedure applied</b>	<b>17</b>
3.1. Reference stocks and estimation stocks	17
3.2. Model used for estimation	18
3.3. Current price of reference property	19
3.4. Current value of reference property	21
3.5. Calculation method	21
3.5.1. Renewal of reference stocks and estimation stocks every two years	22
3.5.2. Calculating primary indices in the current period	23
3.5.3. Calculating aggregate indices in the current period	24
3.6. Numerical exemple for November 2012	26
<b>4 – Notarial databases</b>	<b>29</b>
4.1. Description of databases	29
4.2. Delay in incorporating transactions	29
4.3. Coverage rate	31
4.4. Scope of coverage of indices, data quality	33
4.4.1. Defining the scope	33
4.4.2. Transactions used for the calculation	33
4.4.3. Available variables	35
4.4.4. Dealing with missing information	36
4.4.5. Structure of estimation stocks	37
<b>5 - Estimating the hedonic equation, practical application</b>	<b>43</b>
5.1 Estimating the hedonic equation in two steps	43
5.2 Numericals examples	44
5.2.1 Examples of regressions (2009-2010 stock)	44
5.2.2 Quality of hedonic regressions	55
<b>6 – Seasonal adjustments to indices, monitoring and publication</b>	<b>61</b>
6.1 Seasonal adjustments to indices	61
6.1.1 Method for calculating corrections for seasonal adjustments	61
6.1.2 Taking corrections into account for trading days	61

6.1.3 Nature of seasonally adjusted data	61
6.1.4 Frequency of calculating seasonal adjustment coefficients	61
6.1.5 Direct or indirect method	62
6.1.6 Calculation	62
6.1.7 Results	65
6.2 Dashboard	66
6.2.1 Objectives and composition of the dashboard	66
6.2.2 Examples of tables	66
6.3 Publication	69
<b>7 - Comparison of V2 and V3</b>	<b>73</b>
7.1 Different sources of divergence	73
7.2 Overall divergence between versions 2 and 3	73
7.3 Analysis of divergence between versions 2 et 3	78
7.3.1 Divergence due to using super-définitive data	78
7.3.2 Impact of updating the zoning system	79
7.3.3 Impact of the new calculation method	80
7.3.4 Impact of correcting an error	82
7.3.5 Impact of the new method of seasonal variation adjustment	83
Appendix 1: Transmission of deeds of sale to the notarial databases and estimating coverage rates	85
Appendix 2: Geographic divisions	89
Appendix 3: Updating the model specification	107
Appendix 4: Stability tests and duration of reference period	115
Appendix 5: Alternative calculation methods	121
Appendix 6: Advance price indices	127
Appendix 7: Agreement with PNS	129
Appendix 8: Agreement with the Conseil supérieur du notariat and Min.not	135
Appendix 9: Definitions	141
Appendix 10: Bibliography	145
Appendix 11: Current developments concerning the indices	147
