Informations Rapides

10 mars 2011 - n° 63 CONJONCTURI Main indicators

Industrial Production Indices - January 2011

In January 2011, manufacturing output increased (+1.8%)

In January 2011, manufacturing output increased in volume (+1.8%). It was almost stable in December 2010 (-0.2%). It was mainly driven by output of intermediate goods that meets the demands of Construction, rebounding after the trough of December due to climatic conditions.

In the **industry**, output increased as well (+1.0%).; in January, the decrease in energy was due to a lower consumption of gas and electricity, still in line with the climatic conditions

In the last three months (quarter-on-quarter change), the output increased in the manufacturing sector (+2.0 %) and in the industry as a whole (+2.2%).

In the last three months, manufacturing output increased (+2.0%)...

In the last three months, the output increased in the "other manufacturing" (+1.6%, q-o-q), in the manufacture of transport equipment (+4.4%), in the electrical, electronic equipment and machine equipment (+2.4%) and in the manufacture of coke and refined petroleum products (+14.8%). It remained stable in the manufacture of food products and beverages (-0.1%).

...and exceeded it's last year's level by 6.1%

Manufacturing output rose by 6.1% (y-o-y). It soared in the "other manufacturing" (+6.7%), in the electrical and electronic equipment and machine equipment (+8.6%) and in the manufacture of transport equipment (+6.0%).

Please note: all the data are adjusted for seasonal variations (SA) and the number of working days (WDA).

(1) n.e.c. : not elsewhere classifiable

(2) Main industrial groupings : definition in Commission regula-

tion EC of 14 June 2007 Sources: Insee, SSP, SOeS

In January 2011, output increased in the « other manufacturing » (+1.9%)...

Output strongly increased in the manufacture of rubber or plastics products, and other non-metallic mineral products (+8,5%). It also increased in the manufacture of basic metals and fabricated metal products (+1.5%), in the manufacture of chemicals and chemical products (+2.7%) and in the manufacture of wood and paper products; printing and reoutput of recorded media (+3.0%).

In the other hand, output decreased in the "other manufacturing, repair and installation of machinery" (-2.3%).

...in the manufacture of electrical or electronic equipment and machine equipment (+3.5%)...

Output strongly increased in the *manufacture of computer*, *electronic and optical products* (+8.0%). It also increased in the *manufacture of electrical equipment* (+2.8%) and more slightly in *manufacture of machinery and equipment n.e.c.* (+0.6%).

...and slightly increased in the manufacture of transport equipment (+0.6%)

Output increased in the *manufacture of motor vehicles, trailers and semi-trailers* (+1.5%) and decreased in the *manufacture of other transport equipment* (-0.7%).

• Revisions: -0.11 point in December

In December 2011, manufacturing output was almost stable (-0.2%)

The revision of the raw series, due to delayed firms' answers, especially apply to the *manufacture of* of machinery and equipment n.e.c. and to the "other manufacturing repair and installation of machinery". The new calculation of the SA-WDA especially applies to the *manufacture of rubber or plastics products, and other non-metallic mineral products*.

Note of reading: in the manufacturing, the SA-WDA evolution between November and December is revised by -0.11 point: 0.21 is due to the raw serie's revision and -0.32 to the new calculation of the SA-WDA.
