■ Enterprise creation - February 2014

Decrease in business start-ups in February 2014

Warning: From September 2013 data onwards, the seasonal and working-day adjustment model has been modified, for monthly business start-up data. Previously, only the time series for business set-ups excluding self-managed enterprises were seasonally adjusted. The self-managed enterprises time series were too short to be properly deseasonalized. From now on, the self-managed enterprises time series are seasonally adjusted for each main sector. However, for the self-managed enterprises time series in the sectors of "Financial and insurance activities", "Real estate" and "Trade, transport, accommodation and catering", the raw data are similar to seasonally adjusted data, due to a low number of registrations and difficulty identifying a seasonal trend.

In February 2014, the number of business start-ups including self-managed enterprises seasonally and working-day adjusted data (sa-wda) slipped compared to January (-1.9%). However business start-ups excluding self-managed enterprises stabilized (+0.4) .

+5.3% year-on-year (quarterly basis)

The amount of entries added up in the last quarter increased compared to the same quarter one year before (+5.3%).

The sectors that most contributed to that rise were business support activities and wholesale and retail trade, transport, accommodation and food and beverage service activities.

-0.9% year-on-year (twelve months basis)

During the last twelve months, the number of business start-ups decreased by 0.9% year-on-year.

More than one creation out of two is a self-managed enterprise

In February 2014, 51% businesses sets up were self-managed enterprises.
