## ■ New orders received in Industry – November 2012

**In November 2012, new orders in industry were almost stable (-0.1%)**

**Warning :** "New orders received in industry – December 2012" will be the last issue of new orders index in industry. New orders index has been issued since 2003 to reply a new European requirement. Eurostat intended to build a leading indicator of industrial production in the European Union. As the index obtained had not achieved its aim, Eurostat removed the requirement in 2012. In order to lighten the administrative burden on business, INSEE decided to no longer investigate new orders received monthly. Monthly business surveys will continue to provide qualitative information of the situation of order levels in industry.

In November 2012, new orders received in industry (except heavy transport equipment) were almost stable (-0.1%). They had increased in October (+1.4%). Non-domestic new orders increased strongly (+2.8%).

### **During the last three months, new orders improved moderately in industry (+0.4%)**

During the last three months (q-o-q), new orders went up in the *manufacture of motor vehicles, trailers and semi-trailers* (+1.5%) and to a lesser extent in the *other manufacturing* (+0.4%). On the other hand, new orders decreased in the *electrical and electronic equipment* by 0.9%.

Over the same period, non-domestic new orders grew by 1.8%.

### **Compared to last year, new orders went up (+1.2%)**

The level of new orders during the last three months increased by 1.2% compared to last year. New orders soared dramatically in the *manufacture of motor vehicles, trailers and semi-trailers* (+13.1%). New orders increased in the *other manufacturing* (+1.0%). On the opposite, new orders fell considerably in the *electrical and electronic equipment* (-9.4%).

The level of non-domestic new orders rose (+5.9%).
