■ Enterprise creation - October 2013

Decrease in business start-ups in October 2013

Warning: From September 2013 data onwards, the seasonal and working-day adjustment model has been modified, for monthly business start-up data. Previously, only the time series for business set-ups excluding self-managed enterprises were seasonally adjusted. The self-managed enterprises time series were too short to be properly deseasonalized. From now on, the self-managed enterprises time series are seasonally adjusted for each main sector. However, for the self-managed enterprises time series in the sectors of "Financial and insurance activities", "Real estate" and "Trade, transport, accommodation and catering", the raw data are similar to seasonally adjusted data, due to a low number of registrations and difficulty identifying a seasonal trend.

In October 2013, the number of business start-ups weakened compared to September: -0.7% for business setting up seasonally and working-day adjusted data (sa-wda) including self-managed enterprises. The decrease in self-managed enterprises is partly balanced by business start-ups excluding self-managed enterprises +1.9% (sa-wda).

-1.6% year-on-year (quarterly basis)

The amount of entries added up in the last quarter decreased compared to the same quarter one year before (-1.6%).

The sectors that most contributed to that decrease were construction, household services and business support activities.

-4.3% year-on-year (twelve months basis)

During the last twelve months, the number of business start-ups decreased by 4.3% year-on-year.

More than one creation out of two is a self-managed enterprise

In October 2013, 51.6% businesses sets up were self-managed enterprises.
