■ New orders received in Industry – July 2012

In July 2012, new orders in industry decreased (-1.1%)

Warning : “New orders received in industry – December 2012” will be the last issue of new orders index in industry.

New orders index has been issued since 2003 to meet a new European requirement. Eurostat intended to build a leading indicator of industrial production in the European Union. As the index obtained had not achieved its aim, Eurostat removed the requirement in 2012. In order to cut the administrative burden on business, INSEE decided to no longer investigate new orders received monthly. Monthly business surveys will continue to provide qualitative information on the state of order levels in industry.

In July 2012, new orders received in industry (except heavy transport equipment) decreased by 1.1%. New orders had already decreased in June (-1.0%).

Non-domestic new orders slightly increased by 0.3%.

During the last three months, new orders decreased in industry (-1.6%)

During the last three months (q-o-q), new orders decreased in the “other manufacturing” sector (-2.5%) and in the “electrical and electronic equipment” sector (-1.8%). However, new orders increased in the car industry (+1.2%).

Over the same period, non-domestic new orders increased by 2.2%.

Compared to last year, new orders were slightly higher (+0.2%)

The level of new orders during the last three months was 0.2% higher than a year ago. The level of non-domestic new orders increased in a more sustained pace (+5.7%).
