■ Producer cost indices for construction - April 2015

In April 2015, producer cost indices for construction were virtually stable (+0.1%)

In April 2015, producer costs for construction were virtually flat in construction (+0.1% after +0.2% in March; -0.7% over a year). They increased slightly in civil engineering (+0.2% after +0.8%, -4.1% over a year).

Producer cost indices for construction

		In %		
NAF	Heading	Weights (in %)	Apr. 15/ Mar. 15	Apr. 15/ Apr. 14
F	Construction	100.0	+ 0.1	- 0.7
41.2	Construction of buildings	10.1	+ 0.1	+ 0.1
42	Civil engineering	16.2	+ 0.1	- 4.6
43	Specialised construction works	73.7	+ 0.1	+ 0.0
43BT	- of which for buildings	64.2	+ 0.1	+ 0.5
43BTC	- of which for new building	24.6	+ 0.1	+ 0.2
43BTR	- of which for existing buildings	39.6	+ 0.0	+ 0.7
43TP	Specialised works for civil engineering	9.5	+ 0.2	- 3.2
BT	Buildings (41.2 + 43BT)	74.3	+ 0.1	+ 0.4
TP	Public works (42 + 43TP)	25.7	+ 0.2	- 4.1

Materials

In April 2015, prices of materials for construction of buildings were virtually stable (+0.1%), the increase in the price of blocks and slabs (+0.9%) being offset by the fall in the price of ribbed bars in steel (-0.5%). In civil engineering, the prices of materials slowed significantly (+0.2% after +2.4%), due to the stabilization of the price of bitumen (-0.1% in April after +11.9% in March; -36.4% over a year).

Materials costs

Annual change in %

Equipment

In April 2015, the equipment cost increased in all construction activities, especially in finishing work (+0.9% after +0.2%, +2.6% over a year), mainly reflecting the price rise of "other machine tools".

Energy

In April 2015, energy cost diminished slightly in construction of buildings (-0.3% after +3.0%; -7.6% over a year), due to the slight downturn back of gas oil prices. In contrast, it increased in civil engineering (+2.0% after +1.2%; -8.0% over a year), due to the upsurge in price of heavy fuel oil (+12.5% in April 2015).

Revisions of costs of production indices in construction

In points

		Jan. 15	Feb. 15	Mar. 15
F	Construction	0.1 ⁽¹⁾	-0.1	///
41.2	Construction of buildings	0.1	///	///
42	Civil engineering	-0.1	-0.4	0.2
43	Specialised construction works	0.1	///	0.1

Source: INSEE

Reading note: (1) producer cost for construction between December 2015 and January 2015 published in June 2015 has been updated from -0.4% to -0.3%, that is to say an upward revision by 0.1 point.

Definition

Production cost indices in construction are composite statistical indices, aggregating cost indices by expenses items. These indices are subject to revision. They are primarily used for national accounts and macroeconomics analyses.

Method of calculation

The six cost items are defined according to the "KLEMS" analytical accounting approach (K = capital goods "equipment", L = "labour", E = "energy", M = "materials", S = "services"), with the supplementary item T = "transport".

Each cost item is itself made up of elementary indices issued from public statistics.

The composition of "equipment" item is adapted to the construction of buildings (structural works), specialised construction works for existing buildings (finishing) and public works respectively. "Equipment" item of specialised construction works for new buildings is a weighted average of the "equipment" items for structural works and finishing.

The composition of "materials" item is adapted to the construction of buildings, specialised construction works for old buildings (finishing), civil engineering and specialised works for civil engineering respectively.

The composition of "energy" item is different between buildings (diesel oil) and public works (road diesel and heavy fuel oil). Building companies generally use their trucks, while those of public works resort to freight transport companies. Thus, transport indices of the two activities are different.

The weights of cost items and elementary indices are normally fixed for the duration of the base.

Cost indices and cost items are aggregated using a Laspeyres chain-linked technique, reference 100 in 2010.

"Buildings" group activities "41.2: Building Construction" and "43 except 43.1, 43.21B and 43.99E: Specialised construction works except demolition, site preparation, electrical installation on the highway and rental and leasing services of construction and civil engineering machinery and equipment with operator".

"Public Works" include activities "42: civil engineering", "43.1: Demolition, site preparation" and "43.21B: electrical installation on the highway".
