31 juillet 2015 - n°186

## Main indicators

### ■ Household consumption expenditure on goods – June 2015

#### Increasing in June (+0.4%), household consumption of goods was almost stable over the second quarter of 2015 (-0.1%)

In June 2015, household consumption expenditure on goods accelerated: +0.4% in volume\*, after +0.1% in May. This acceleration was mainly attributable to the dynamism of food consumption (+0.6% in June after +0.0% in May). However, over the second quarter, household expenditure on goods was almost stable (-0.1%) after a wide increase over the first quarter (+1.5%): the decline in consumption of energy (-2.2%) offset the dynamism of food consumption (+0.8%).

- **Engineered goods : increasing in June, stable over the quarter**

#### Durables: slowing in June and over the quarter

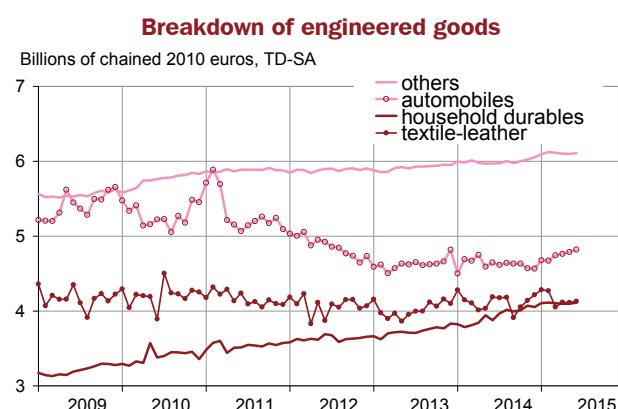

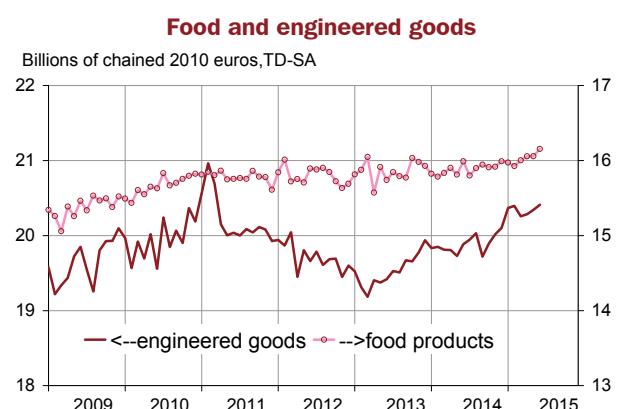

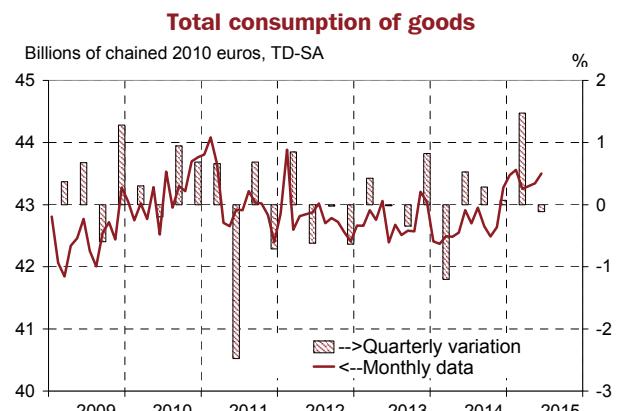

Household expenditure on durable goods decelerated slightly in June (+0.4% after +0.7% in May). Expenditure on household durables went up (+0.4%), after two sluggish months, and car purchases accelerated slightly (+0.7% after +0.5% in May). By contrast, purchases of other durables declined markedly (-0.7% after +2.9%), notably in watch/jewellery.

Over the second quarter 2015, expenditure on durable goods slowed down (+1.0% after +1.9%), notably expenditure on household durables (-0.1% after +1.6%). Car purchases remained dynamic (+2.0% after +2.3%).

#### Textile-leather: increasing in June, decreasing over the quarter

Consumption of textile, clothing and leather increased in June (+0.4% after -0.1%). However, purchases stepped back over the whole second quarter (-2.0% after +1.6%).

[\* Volumes are chained and all figures are trading days and seasonally adjusted.]

## Other engineered goods: moderate rise in June

Consumption expenditure on other engineered goods increased slightly in June (+0.2%, after -0.1%), especially in hardware. They were almost flat over the second quarter (-0.1% after +1.4%).

- Food products: acceleration in June and over the quarter**

In June, consumption of food products bounced back (+0.6% after being stable in May). Over the second quarter, it accelerated (+0.8% after +0.2% over the previous quarter).

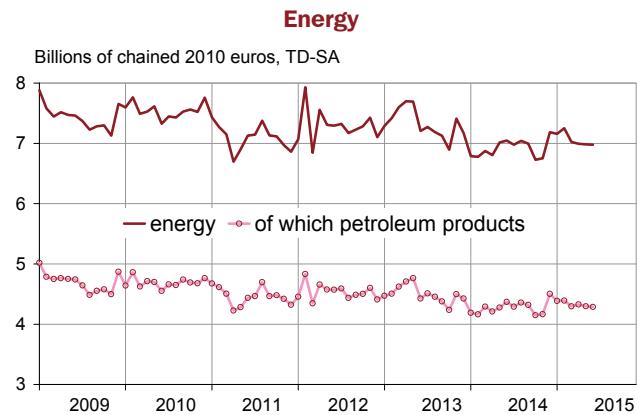

- Energy: downturn over the quarter**

In June, household consumption of energy products was virtually stable (-0.1%).

Over the second quarter, consumption of energy products stepped back (-2.2% after +3.7%), mainly in gas and electricity.

## The variation in May remains unchanged

Since the previous publication, new information has been integrated, and the seasonal adjustment coefficients were updated. However, the variation of households' consumption of goods remains unchanged in May (+0.1%).

## For more information:

SCOPE AND DEFINITION - Consumption expenditure on goods is compliant with the national-accounts definition (NAF Rev. 2). In 2010, they accounted for half of total households' consumption expenditure. They are divided into three main items:

- FOOD: products of agriculture, forestry and fishing (AZ), food, drinks and tobacco (C1)
- ENERGY: mining products, as well as water, gas, electricity and air conditioning, sanitation and waste management (DE), and refined and coked products (C2).
- ENGINEERED: computers, electronic, electrical and optical goods (C3), transport equipment (C4), textiles and clothing, products made of leather, wood, paper, metals, plastic, rubber, chemicals, minerals, furniture, hardware, drugs (C5). Within this heading are distinguished "durable" goods which include transport equipment, household durables (furniture, household appliances, etc.) and other durable goods (jewelry, watches, GPS, glasses, medical devices, etc.).
- The manufactured goods correspond with all the products C1, C2, C3, C4, C5.

SOURCES: This indicator is the compilation of a variety of statistical sources issued by the Bank of France, the French Federation of Automobile Manufacturers (CCFA), the Department of Observation and Statistics (SOeS) of the Ministry of Equipment, the French Institute of Fashion (IFM), the National Health-Insurance Administration (CNAM), the National Federation of Rubber and Plastics Industries (SNCP), the Board of Oil (CPDP), GFK, Logista, the International Union Committee of Automobile and Motorcycle (CSIAM), etc. Figures are seasonally and trading-days adjusted (TD-SA).
