■ Monthly business survey in services – August 2015

In August 2015, the business climate has increased again in services

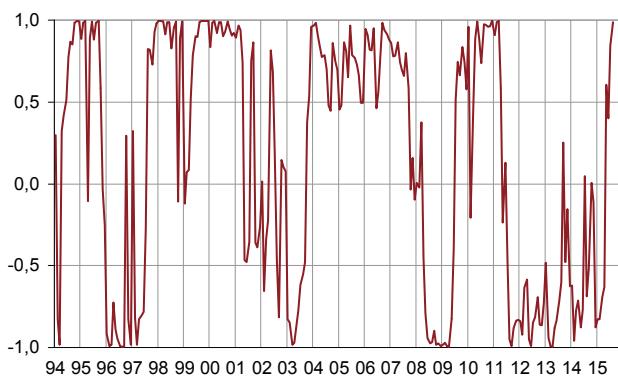

- All services**

According to business managers, the business climate in services has improved again in August 2015. The business climate composite indicator has increased by two points and stands at 99; this level is very close to its long-term average (100). The turning point indicator is in the favourable area.

Business climate composite indicator

Turning point indicator

Note: close to 1 (respectively -1), this indicator indicates a favourable short-term economic situation (respectively unfavourable).

The balance on the general outlook, which relates the assessment of business leaders over their whole sector, has decreased slightly.

The balances on activity have improved significantly. Even if business leaders remain less optimistic than in average on their past activity, their expectations on activity are above their long-term average.

The balance on expected employment has gone up sharply, whereas the balance on past employment is virtually stable. Both balances stand above their long-term average.

The balances on past and expected investments are almost stable, slightly above their long-term average.
