Main indicators

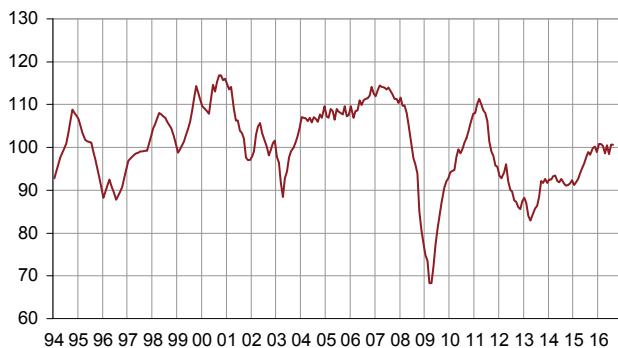

■ Monthly business survey in services – August 2016

In August 2016, the business climate is stable in services

According to business managers surveyed in August 2016, the business climate in services is stable. The business climate composite indicator remains slightly above its long-term average (101).

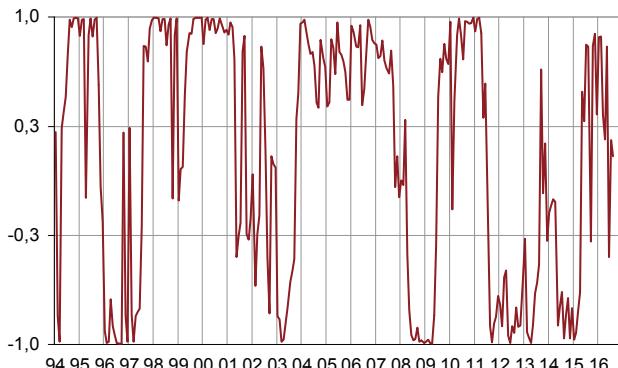

Business climate composite indicator

Standardized indicator : average = 100 and standard deviation = 10

The turning point indicator remains in the uncertainty area.

Turning point indicator

Note: close to 1 (respectively -1), this indicator indicates a favourable short-term economic situation (respectively unfavourable). Between +0.3 and -0.3: uncertainty area.

Business prospects close to their long-term average

The balance of opinion on past activity has recovered slightly and has returned to its level of June. The balances on expected activity and demand remain close to their long-term average.

The balance on general outlook, which relates the assessment of business leaders over their whole sector, has fallen back to its long-term average level, after a slight rebound in July.

The balance on past employment is virtually stable, that on expected employment has gone up slightly, particularly in temporary work agencies. Both balances remain well above their long-term average.

The balance on past investments has increased, whereas that on expected investments is almost unchanged. Both balances stand above their long-term average.

In most subsectors, the business climate stands at its long-term average or slightly above. It has increased by two points in information and communication and in professional, scientific and technical activities. Only the business climate in accommodation and food services has deteriorated sharply and has fallen back clearly below its long-term average.

The business climate is virtually stable in road transport

In road transport, the business climate has decreased by one point. At 103, it remains above its long-term average. The balance on past activity has recovered but the balance on general outlook has deteriorated.

In accomodation and food service activities, the business climate has fallen back clearly below its long-term average

In accomodation and food service activities, the business climate has decreased by eight points and has fallen back to its level of June (92), clearly below its long-term average. The balances on expected activity and demand and on general outlook have deteriorated sharply.

The business climate has reached its long-term average in information and communication

In information and communication, the business climate has gone up by two points and has reached its long-term average (100). The balance on past activity has recovered markedly.

The business climate in real estate is stable

In real estate activities, the business climate is unchanged (102). The decrease in the balances on past and expected activity is offset by the improvement in the balance on past employment.

In professional, scientific and technical activities, the business climate has improved

The business climate in professional, scientific and technical activities has improved by two points and stands slightly above its long-term average (102). The balance on past activity has decreased but that on general outlook has risen.

The business climate in administrative and support service activities is stable, slightly above its long-term average

In administrative and support service activities, the business climate is unchanged, slightly above its long-term average (101). The balance on past activity has gone down and has fallen back slightly below its long-term average. However, the expectations on activity and demand have recovered after a decrease last month. The balances on employment remain well above their long-term average.
