

Building indices, Civil engineering indices and Various indices for Construction - April 2016

Building indices, Civil engineering indices and various indices for construction in April 2016

	Heading	Feb. 2016	March 2016	April 2016
BT02	Earthworks	104.1	104.5	104.7
BT03	Masonry and concrete pipes (except frame. reinforced concrete. tiling. coatings and plastering)	102.7	102.7	102.9
BT06	Framework. reinforced concrete structures	101.7	101.6	101.7
BT07	Framework and metal frames	99.0	99.0	99.3
BT08	Plaster and prefabricated plaster	103.6	103.8	103.9
BT09	Ceramic coatings and tiles	103.5	103.6	103.9
BT10	Plastic coatings	106.5	106.7	106.7
BT11	Synthetic textile coatings	107.7	108.4	108.4
BT12	Natural textile coatings	107.1	108.0	108.1
BT14	Coatings in cut natural stone plate and similar products	108.8	108.8	108.9
BT16b	Wood frame	104.6	104.9	105.1
BT18a	Interior joinery	106.5	106.6	106.8
BT19b	Exterior joinery	106.3	106.3	106.6
BT26	Plastic bay closing works including PVC window	104.6	104.9	104.6
BT27	Aluminium bay window closing works	101.1	101.0	100.8
BT28	Ferrous metals bay closing works	98.3	98.4	98.9
BT30	Schist slates roofing	107.5	107.7	108.0
BT32	Baked clay tiles roofing	106.2	106.0	106.5
BT33	Concrete tiles roofing	106.4	106.3	106.7

Index for updating material assets in construction

		2	2010=1
Heading	Feb. 2016	March 2016	April 2016
IM Index for updating material assets in construction	1.0308	1.0308	1.0339

Note: The IM index goal is to update the value of equipment in absence of an available replacement value for the calculation of equipment use charges. It should not be confused with various index for construction "equipment item for civil engineering indices" (MATP) whose purpose is escalating contracts. Source: INSEE

For more information:

Definition

The Building indices, Civil engineering indices and various indices for construction are producer cost indices of different activities in the construction sector, mainly used for escalating contracts.

Method of calculation

The Building indices and Civil engineering indices are costs indices of different activities in the construction sector. comprehended from six items in an analytical accounting process similar to the "KLEMST" approach used by economists in relation to productivity (where K = capital for "assets", L = labour, E = energy, M = materials, S = services for "miscellaneous costs", T = transport). Each item is broken up into basic indices issued from public statistics. The weightings of items and basic indices are fixed during the duration of the base.

Uses

Businesses and local authorities can use these official indices for construction work bids, by selecting the activity that is closest to the subject of their bid. These "indices" consist of parametric formulae representing changes in costs for different inputs, in compliance with guide "Le prix dans les marchés publics" of Ministries of economy and finance. However, other better adapted parametric formulae are also permissible, such as using the "miscellaneous costs" and "transport" headings published under "various indices in the construction industry".

In contracts signed before the publication in the *Journal Officiel* of 16th of January 2015, past Building indices (BT), current Civil Engineering indices (TP) and various indices for construction have to be used until September 2014 inclusively, and, since October 2014 inclusively, the stopped series can be extended by the multiplication of the corresponding series by the connecting coefficient. The obtained product is to be rounded with one decimal.

Dissemination

Theses indices ate monthly published in the Journal officiel. Historical data are available on www.bdm.insee.fr :
