More business managers forecast an increase in their investment in H1 2017

In January 2017, more entrepreneurs reported a rise rather than a fall in their investment between H1 and H2 2016. For H1 2017, more business managers forecast also an increase in their investment than a drop. The corresponding balance of opinion has reached its highest level since July 2011.

Opinion of industrials regarding six-month change in investment (second estimation)

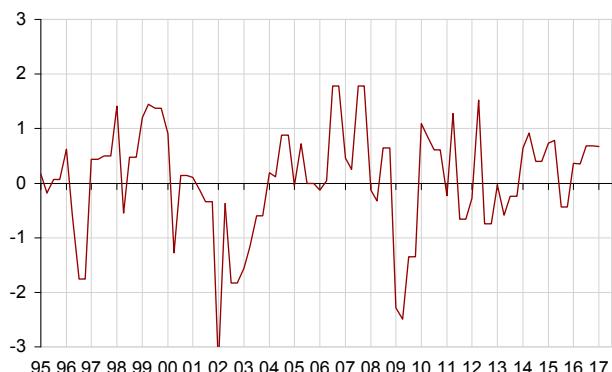

How to read this graph: In the manufacturing industry, more business leaders surveyed in January 2017 indicated an increase in their investment than a drop between H1 and H2 2016 ("actual"). More business leaders also anticipated an increase in their investment than a decrease between H2 2016 and H1 2017 ("forecast").

Source: INSEE - Industrial investment survey

Indeed, business managers were more numerous to revise their expectations for 2016 upwards rather than downwards. This indicator is based on investment amounts declared at each survey by business leaders of the manufacturing industry except those in the agro-food industry and in that of coke and refined petroleum products.

Investment revision indicator
