■ Turnover in large-scale food retailing - February 2017

In February 2017, the turnover in large-scale food retailing was stable

In February 2017, the turnover in large-scale food retailing was stable after an increase by 0.5% in January. Sales of automotive fuels fell back strongly (-3.6%) after two consecutive months of brisk rises (incl. +7.6% in January). However, sales of food products rebounded slightly (+0.5% after -1.4%) and the turnover for non-food products kept on increasing yet (+0.5% après +4.6%).

Over that period, sales in supermarkets flattened out after two consecutive months of rise (incl. +0.9% in January). They remained steady in hypermarkets, like in January.

Moderate increase over the last three months

Over the last three months, the turnover in large-scale food retailing rose moderately (+0.5%).

Sales of automotive fuel shot up significantly (+11.5%) buoyed above all by the price increase of fuel. Conversely, they declined for food products (-1.2%) and even more sharply for non-food products (-2.7%). The turnover grew more markedly in supermarkets (+1.4%) than in hypermarkets (+0.2%).

Slight increase over a year (+0.3 %)

The turnover of the past three months in large-scale food retailing grew slightly (+0.3%) over a year. On the one hand, sales of automotive fuel surged (+17.0%). On the other hand, the turnover of food products (-1.4%) declined and even more that of non-food products (-4.3%).

Year on year, sales increased for supermarkets (+1.5%) while they declined slightly for hypermarkets (-0.2%).
