

Household consumption expenditure on goods - January 2019

Household consumption expenditure rebounded in January (+1.2%)

In January 2019, household expenditure on goods rebounded by 1.2% in volume*, after a sharp decline in December (-1.5%). This rebound was mainly due to an increase in the consumption of energy (+5.4%) and engineered goods (+1.4%), despite a decline in food consumption (-0.9%).

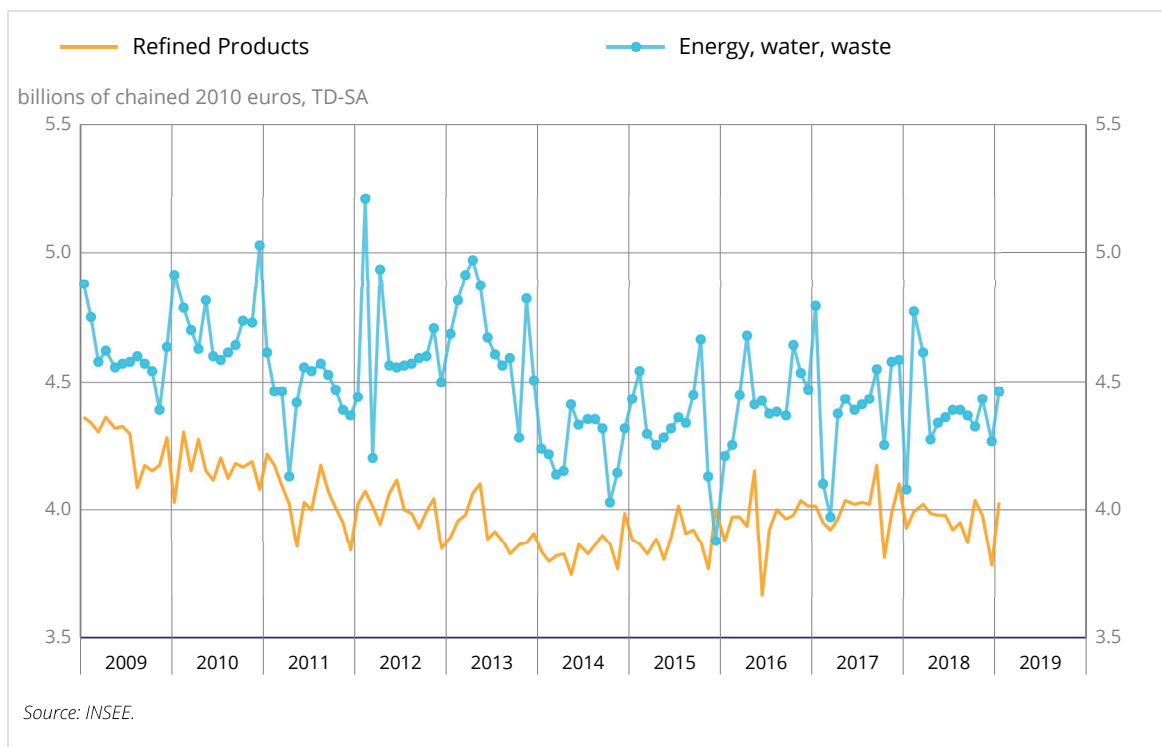

Total consumption of goods

Energy: clear rebound in January

In January, energy consumption increased strongly (+5.4% after -4.3%). Gas and electricity expenditure recovered (+4.5%) after relatively mild temperatures in December. In addition, fuel consumption increased clearly (+6.4% after -4.9%).

Breakdown of energy

Engineered goods: increase in January

In January, spending on manufactured goods bounced back (+1.4% after -1.9%), driven by durable good purchases (+2.4%).

Durables: rebound in January

Consumption of durable goods increased sharply in January (+2.4%, after -3.8%). Transport equipment consumption increased, particularly new car purchases. In addition, after declining in December, spending on housing equipment was on the rise, in particular purchases of telephones and, to a lesser extent, television, computer and furniture ones.

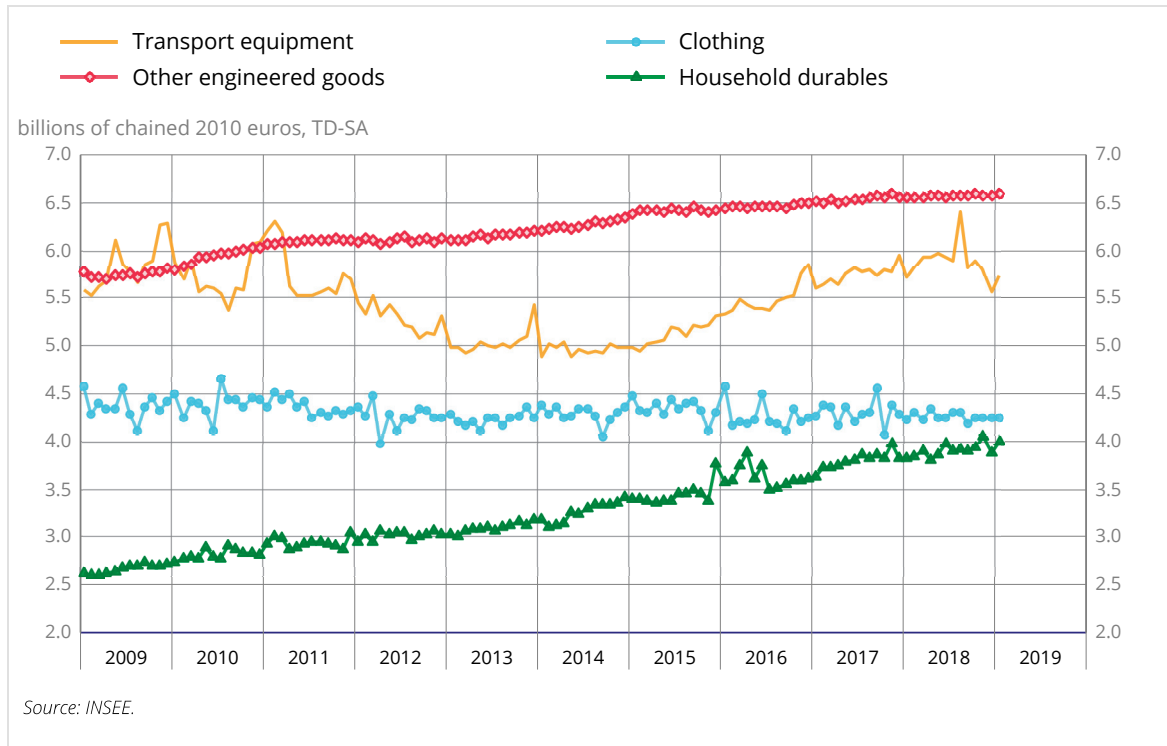

Textile-clothing: slight increase in January

Expenditure on textile and clothing increased slightly in January (+0.3% after -0.2%). In particular, shoe sales increased compared to the previous month.

Other engineered goods: slight increase in January

In January, consumption of "other manufactured goods" increased slightly (+0.3% after 0.0%). Drug purchases rebounded noticeably.

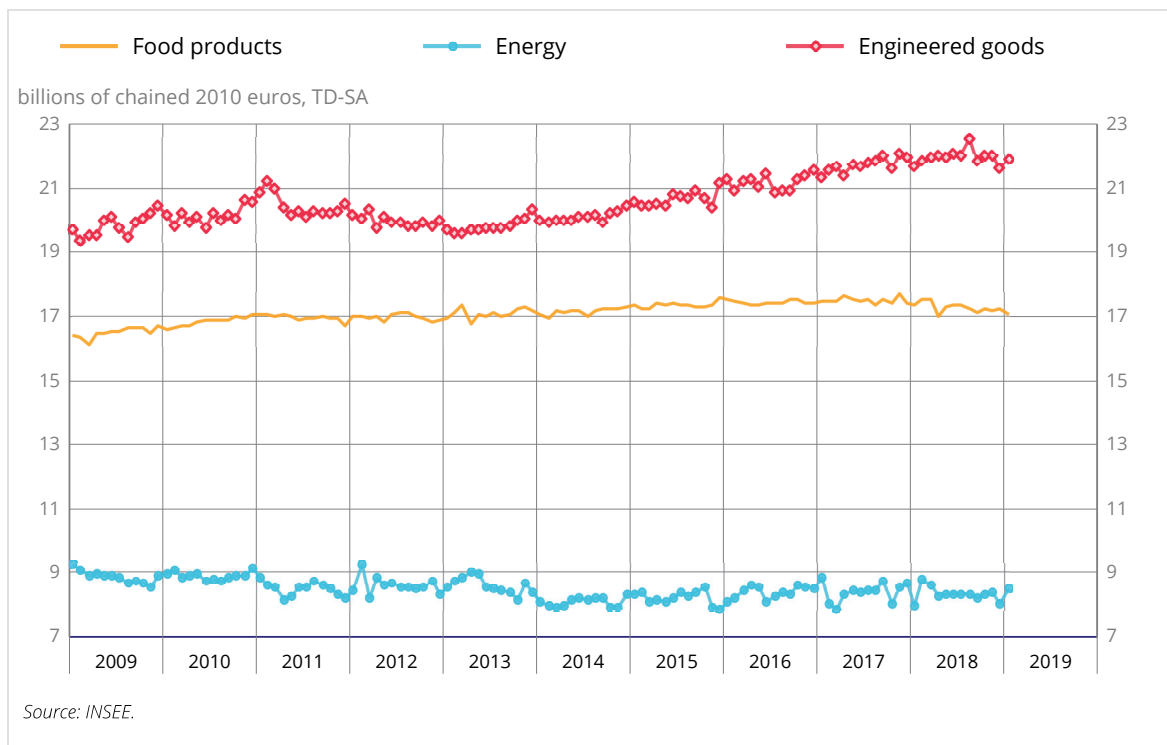

Breakdown of engineered goods

Food products: sharp decline in January

In January, food consumption fell sharply (-0.9% after +0.5%). Purchases of agri-food products declined after a relatively dynamic month of December and fresh fruit and vegetable consumption fell for the second consecutive month.

Food products, engineered goods and energy

The variation in December 2018 is unchanged

The variation in household expenditure on goods in December 2018 is unchanged (-1.5%). Since the previous publication, new information has been integrated and the seasonal adjustment coefficients have been updated but the slight revisions in different aggregates have offset each other.
