

Agricultural means of production purchasing price indices (IPAMPA) - base 2005 - Stopped series

Producing organisation: INSEE

- [Read the “Informations Rapides” related to this indicator.](#)

Introduction

The IPAMPA measures the variations in prices borne by the agricultural industry.

Products	Weightings
General index	100,000
Current consumer goods	75,805
Energy	8,415
Seed	5,050
Fertiliser and enriching agents	9,161
Crop protection products	7,718
Animal feed	18,876
Veterinary products and services	3,839
Small equipment and tools	1,400
Equipment maintenance and repair	5,554
Building maintenance and repair	906
Overheads	14,886
Investment goods	24,195
Equipment	17,029
- tractors	7,063
- cultivation machinery and equipment	3,580
- harvesting machinery and equipment	3,730
- commercial vehicles	2,656
Structures	7,166

The proportion of the index devoted to seed, fertiliser, crop protection products, animal feed, veterinary expenses and small equipment and tools is based on a survey carried out by the Statistics and Forecasting Department of the Ministry of Agriculture on a sample of retail outlets which provide the prices of nearly 3,500 items.

Information for the other sectors is provided by industrial sale prices, consumer price indices, and the building and civil engineering index.

The IPAMPA is calculated in 2005 base. Its weightings are taken from the Agriculture Accounts.
