

# Agricultural means of production purchasing price index (IPAMPA) - Base 2010

Producing organisation: INSEE

- [Read the “Informations Rapides” related to this indicator.](#)

## Introduction

The IPAMPA measures the variations in prices born by the agricultural industry.

Main agregates	Weights
Total input	1,000
Intermediate consumptions	764
Energy	100
Seeds	57
Fertilisers and soil improvers	92
Plant protection products	78
Animal feed	205
Veterinary expenses	43
Small equipment and tools	17
Maintenance of materials	67
Maintenance of buildings	9
Other goods and services	97
Goods and services contributing to investment	236
Material	186
Tractors	79
Machinery and equipment for cultivation	36
Machinery and equipment for harvesting	42
Utility vehicles	18
Buildings	50

The part of the index devoted to seed, fertiliser, crop protection products, animal feed, veterinary expenses and small equipment and tools is based on the survey (visa of CNIS n° 2013M050AG) carried out by the Statistics and Forecasting Department of the Ministry of Agriculture on a sample of retail outlets which provide the prices of nearly 3,500 items.

Information for the other sectors is provided by industrial production or import prices, consumer price indices, and the building and civil engineering index.

The IPAMPA indices are based on the year 2010. Its weights are taken from the Agriculture Accounts.
