HY130 (Regular inter-household cash transfer paid)
HY131 (Alimonies paid (compulsory + voluntary))
ACHARGE (TCM variable: Provide regular financial assistance)
TYPAIDE (TCM variable:Type of assistance provided)

In ^AENQ-1, did you[, you or a member of your household,] provide regular financial assistance to persons not belonging to your household?

Multiple answers possible

In order to be considered as transfer income, the amount must form an integral part of the income used to support daily living. You should therefore exclude gifts and other presents given in connection with specific events and donations to associations.

In the case of a student whose rent is being paid by his or her parents, this assistance must be recorded as a transfer for both the parents (assistance provided) and the student (assistance received). On the other hand, where a student is living in a home belonging to his or her parents, this benefit should not be recorded.

1. Yes, some or all of the rent (directly or indirectly)

OCALIM *(SET OF)*

HY080 (Regular inter-household cash transfers received)
HY081 (Alimonies received (compulsory + voluntary))

In ^AENQ-1, did you[, you or a member of your household,] receive regular financial assistance from persons not belonging to your household?

Multiple answers possible

In order to be considered as transfer income, the amount must form an integral part of the income used to support daily living. You should therefore exclude gifts and other presents given in connection with specific events and donations to associations.

In the case of a student whose rent is being paid by his or her parents, this assistance must be recorded as a transfer for both the parents (assistance provided) and the student (assistance received). On the other hand, where a student is living in a home belonging to his or her parents, this benefit should not be recorded.

1. Yes, some or all of the rent (directly or indirectly)
2. Yes, alimony (received from a former spouse, descendant, ascendant or any other person living outside of your household)
3. Yes, other regular financial assistance
4. No, no regular financial assistance
